

Government

Letter to the Editor The Orange County Register

Concerning Fees

Dear Editor,

Money taken out of the pocket of the working class of America and given to the government under any other name is still called taxes. We may be fooled by the word fees and the trickery used to milk the working people of America, but biting off the hand that feeds you bears its own retribution.

It never occurs to our muscle-flexing bureaucrats that the superfluous cutting of the fat in Washington, Sacramento and any other government stronghold, would take care of our huge debt and keep the working hands feeding the machinery that keeps America prospering.

Respectfully yours,

Marie Kolasinski
