## Letter to the Mesa Verde Homeowners Association

March 16, 2005

Please, for the love of God, let all of us pull together and help beautify homes that cannot afford the city's idea of beautification. It is a disgrace to our freedom to be threatened with a fine for lack of money to upgrade property.

If we here in Mesa Verde set an example of helping rather than chastising and bullying, we may yet have a community — a family.

Government = fine them if they do not belong to the anal every blade of grass mentality, and tax them if they do upgrade to meet their anal codes.

Also, as I walked through Fairview Park with its multiple of wild flowers, animals scurrying here and there, I marveled at its pristine beauty. Then I read that Costa Mesa officials have decided, contrary to the majority's vote, to rip up what is already beautiful and spend millions of our money beautifying it to meet their stupid city engineer's idea of beauty.

God help us! If this a democracy, who needs it!
