**Letter to the Editor, Orange County Register and The Los Angeles Times**

Dear Editor,

## **ORANGE COUNTY OFFICIALS DRUNK WITH POWER ON THE BLOOD OF THEIR SUBJECTS**

When any judge can sentence a 60 year old woman to spend 240 hours picking up trash for no apparent crime, it's time we start reviewing all jail and prison inmates and start emptying the jails and incarcerating said judge and DA and other blood thirsty, power hungry whoremongers.

When asking Judge MacEachern for an alternative to picking up trash for 240 hours like building furniture or making a quilt for Orangewood, her reply was "You already do community service every day by working at Piecemakers. I want to punish you, get you out of your comfort zone."

The mentality of these leeches is appalling. Judge MacEachern has never had a business or she would know that working 12 hours a day to keep food on the table and the Orange County leeches in their comfort zone is hardly a comfort zone.

She sits in her high tower like Jezebel of old, flinging her long locks like a whore and punishes her subjects. Were Queen Victoria or Marie Antoinette any different?

Sincerely,

**Marie Kolasinski**  
Costa Mesa
